### Instructions for instrument selection in the catalogue

So that the customer gets the best equipment solution according to his requirements, we recommend this simple procedure using the following pages:

- Define the dimension of the fitting or interface (e.g. thread G2", DIN-flange DN25/PN16, etc.)
- Determine the electrical connection (e.g. terminal box, cable entry, plug, etc.)
- Find out the operating conditions, min. and max. operating pressure, temperature and specific gravity of the media at the max. operating temperature.
- With the size of the fitting and material of the instrument, a guide specification can be selected on pages 208 to 227.
- The full and final specification can now be generated by reference to the „type key“ on pages 240 to 243.
- With the type description and the technical operating conditions a price quotation can be made or the instrument can be ordered.
- Specification of the requested approval.

# Bypass - Level Indicators 1015

## Description and function

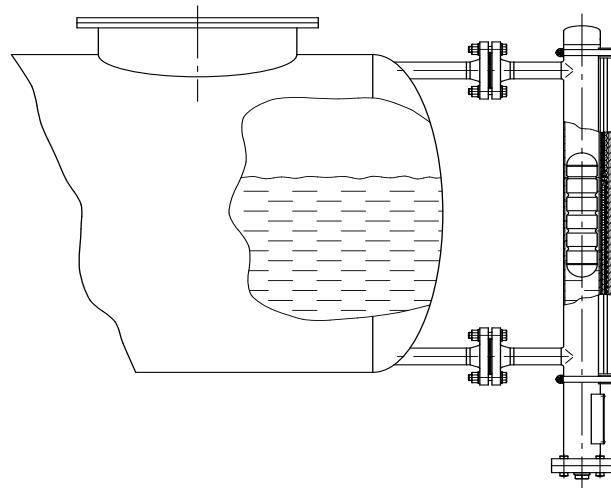

The bypass level indicator forms an integral part of a pressure vessel. A chamber is mounted on the side of a tank or container by means of two process connections. This direct connection ensures that the level in the chamber corresponds precisely to the level of the liquid in the tank or container (communicating pipes). Inside the bypass chamber is a cylindrical float with a built-in magnetic system. The concentrated magnetic field produced by the permanent magnet gives a precise reading for the level of liquid in the chamber. A signal is transmitted by the magnetic field through the wall of the chamber to an externally mounted indicator, as well as to recording and switchgear elements.

### Magnetic Roller Indicators

are used for displaying the level visually. Small plastic or aluminium rollers with inlaid bar magnets are held in an aluminium or stainless steel profile bar. Depending on the level in the chamber, these rollers turn from white to red as the level rises and from red to white as the level falls. The level inside the vessel can thus be indicated continually without requiring any outside power source.

### Level Sensors

are used for the electrical continuous remote indicator of levels. The magnetic field of the permanent magnet in the cylindrical float acts through the wall to activate very small reed contacts that continually register the measurement voltage on a resistance measurement chain. This measurement voltage is proportional to the level (3-wire potentiometer circuit). The resolution of the reed contacts is produced with spacings of 5, 10 and 15mm. When used in connection with a control unit, the resistance value can be converted into a standardized analogous signal.

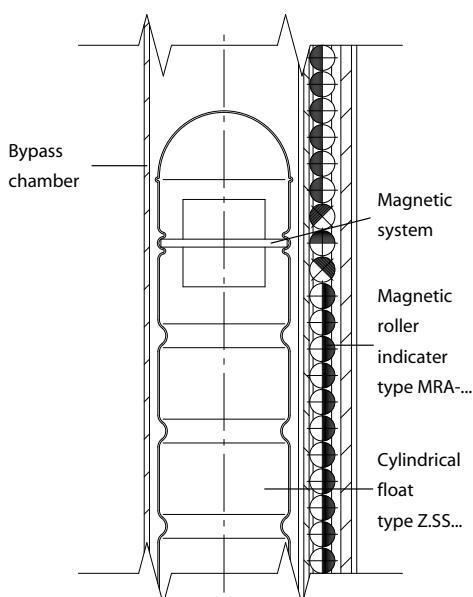

### Magnetic Switches

are used as limit value switches for various filling levels. The permanent magnet in the cylindrical float activates a potential-free bistable reed contact. Completely contactless, it sends out a binary signal that can be used as a „full/empty“, a „pump on/off“ or a „valve open/close“ signal. However, reed contacts are also ideally suited for forwarding signals directly to SPS control units.

### Technical advantages

- Simple, robust and unbreakable design
- Pressure- and gas-proof separation between the measurement and the indicator chambers
- Detection and indication of the filling levels of aggressive, combustible, poisonous, hot , turbulent and severely contaminated media
- Guaranteed operation of the magnetic roller indicator without requiring an auxiliary power source, even in the case of power system failures
- Usable in all fields of industry thanks to the use of a wide range of corrosion-proof materials
- Designs available for pressure ranges from a vacuum up to 400 bar
- Designs available for temperature ranges from -160°C to +400°C
- Designs available for density as of 350 kg/m<sup>3</sup>

## Certificates / Approvals

### Certificates

**SWISS TS**

### SCHWEIZERISCHER VEREIN FÜR QUALITÄTS- UND MANAGEMENTSYSTEME

Certified according to ISO 9000 rev. 2000

### SWISS TECHNICAL SERVICES AG

Approval as production factory, welding examination and procedure qualification incl. restamping certificate for the production of pressure tanks according to SVTI-regulation 501, 201

### Approvals

The company Heinrich Kübler AG can manufacture bypass-level indicators to most national and industrial approvals. Therefore a wide range of instruments with approvals requirements can be produced according to customer's requests.

### TECHNISCHER ÜBERWACHUNGSVEREIN DEUTSCHLAND (PED)

Approval as production factory for manufacture of pressure tanks according to AD HP 0, PED Pressure Equipment Directive 97/23/EG

### SOCIETE NATIONALE DE CERTIFICATION ET D'HOMOLOGATION (ATEX)

Approval for the production of bypass-level indicators according to EU-Directive 94/9/EG

### GERMANISCHER LLOYD (Building of ships)

Approval for the production of bypass-level indicators according to GL-regulations

### BUREAU VERITAS (Building of ships)

Approval for the production of bypass-level indicators according to BV-regulations

### REGISTRO ITALIANO NAVAL (Building of ships)

Approval for the production of bypass-level indicators according to RINA-regulations

### DET NORSKE VERITAS (Building of ships)

Approval for the production of bypass-level indicators according to DNV-regulations

# Bypass - Level Indicators 1015

## Approvals

As an innovative manufacturer of instruments for level control, we can offer to our customers systems according to different directives. The types of approval, applications and limits of use can be taken from the following specifications.

### Approvals

#### Ex

A large number of bypass-level indicators from our standard range, or to customer requests, can be built according to the ATEX-Directive 94/9/EG with the protection types EEx ia IIC T1 to T6, according to the corresponding electrical components in EEx d T4 to T6 or dust Ex/D. By the combination of the instruments with the type key the catalogue shows with the Ex hexagonal logo which components can be used for Ex-instruments.

#### Medium temperature:

##### EEx ia-instruments

T1	300 °C
T3	180 °C
T4	130 °C
T5	95 °C
T6	80 °C

##### EEx d-instruments

T4	120 °C
T5	95 °C
T6	80 °C

#### PED

Under the Pressure Equipment Directive 97/23/EG, any pressure vessel or instrument used within a pressurised system at 0,5 bar or above, has to conform to various categories. Depending on the design data or customer needs, manufacture of instruments is to either of the categories below.

##### Category II

Module	A1
--------	----

##### Category IV

Module	B+D
--------	-----

#### GL / BV / RINA / DNV

Bypass-level indicators for use in shipping can be manufactured to GL (Germanischer Lloyd), BV (Bureau Veritas), RINA (Registro Italiano Navale) or DNV (Det Norske Veritas) standards in large variety of design possibilities complete with controllers.

## Magnetic roller indicator

**Magnetic roller indicator**  
MRA - M ..  
MRK - M ..

Housing:  
- aluminium anodized

Indicator rolls MRA:  
- material: pocan  
- colours: white / red

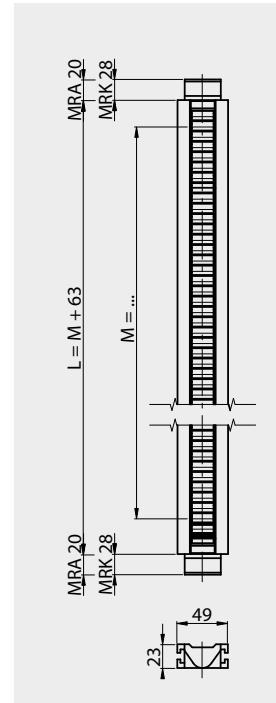

Indicator rolls MRK:  
- material: ceramics  
- colours: white / red

Cover:  
- macrolon (MRA)  
- glass (MRK)

Ambient temperature:  
- MRA -40 °C ... +200 °C  
- MRK 0 °C ... +400 °C

Protection rating:  
- IP 64 (optional IP 67)

Approval:  
- See pages 206-207

**Magnetic roller indicator**  
MNA - M ..  
MNK - M ..

Housing:  
- aluminium anodized

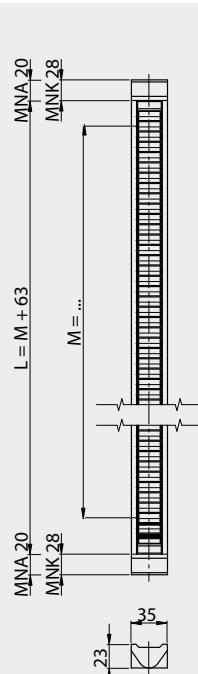

Indicator rolls MNA :  
- material: pocan  
- colours: white / red

Indicator rolls MNK:  
- material: ceramics  
- colours: white / red

Cover:  
- macrolon (MNA)  
- glass (MNK)

Ambient temperature:  
- MNA -40 °C ... +200 °C  
- MNK 0 °C ... +400 °C

Protection rating:  
- IP 64 (optional IP 67)

**Magnetic roller indicator**  
MNAV - M ..  
MNKV - M ..

Housing:  
- aluminium with stainless steel covered

Indicator rolls MNAV:  
- material: pocan  
- colours: white / red

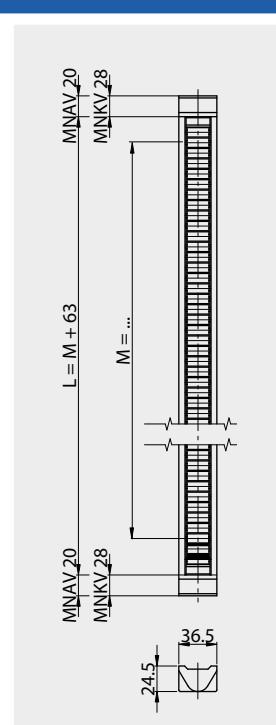

Indicator rolls MNKV:  
- material: ceramics  
- colours: white / red

Cover:  
- macrolon (MNAV)  
- glass (MNKV)

Ambient temperature:  
- MNAV -40 °C ... +200 °C  
- MNKV 0 °C ... +400 °C

Protection rating:  
- IP 64 (optional IP 67)

Approval:  
- See pages 206-207

**Magnetic roller indicator**  
MNAN - M ..

Housing:  
- aluminium anodized

Indicator rolls MNAN:  
- material: pocan  
- colours: white / red

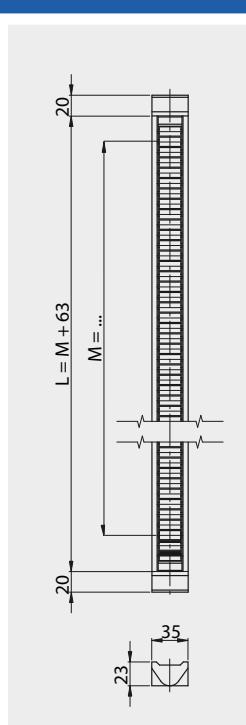

Shock proof design:  
- rollers turning max. 180°

Cover:  
- macrolon  
- glass

Ambient temperature:  
- MNAN -40 °C ... +200 °C

Protection rating:  
- IP 64 (optional IP 67)

Approval:  
- See pages 206-207

## Magnetic switch

### Technical data

#### Housing:

- aluminium anodized

#### Contact function:

- change over

#### Switching action:

- bistable

#### Switching capacity:

- 230 V AC / 60 VA / 1.0 A
- 230 V DC / 30 VA / 0.5 A

#### Protection rating:

- IP65

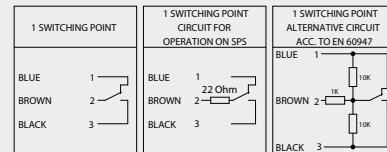

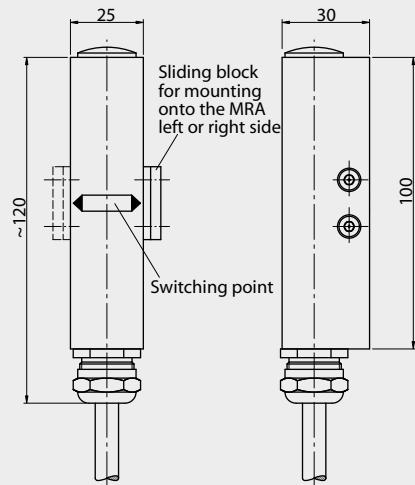

#### Ambient temperature:

- with PVC-cable max. +80 °C
- with Silicone-cable max. +180 °C

#### Options:

- with code addition .. / R
- with 22 Ohm protection resistor
- with code addition .. / N acc. to Namur EN 60947

### BGU - .. PVC / BGU - .. SIL
